

# IBM Software Training

## IBM Tivoli Software

### Maximo Asset Management 7.5

#### Role

This training path is appropriate for individuals in all roles relevant to the product.

#### Assumptions

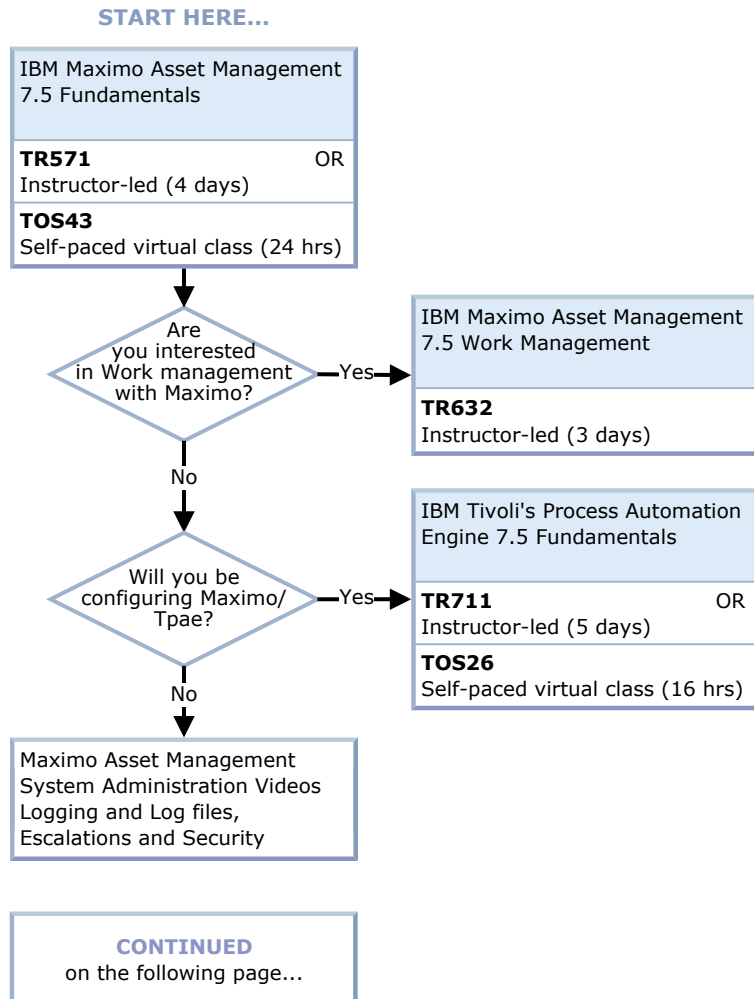

It is assumed that the individual following this roadmap has basic skills in the following areas:

- Good understanding of the J2EE application model, including EJBs, JSP, HTTP sessions, and servlets
- Good understanding of J2EE 1.4 technologies, such as JDBC, JMS, JNDI, JTA, and JAAS
- Good understanding of HTTP server concepts
- Experience in system administration on operating systems such as Windows 2000/XP, UNIX, z/OS, OS/400, and Linux
- Good understanding of basic Internet concepts (for example, firewalls, Web browsers, TCP/IP, SSL, HTTP, and so forth)
- Good understanding of standard markup languages such as XML and HTML
- Basic knowledge of Web services, including SOAP, UDDI, and WSDL
- Basic knowledge of the Eclipse environment

#### Certification

It's a business solution. A way for skilled IT professionals to demonstrate their expertise to the world. It validates your skills and demonstrates your proficiency in the latest IBM technology and solutions.

- Each exam page offers preparatory guidance and sample test materials. While courseware is recommended before taking an exam, keep in mind that real world experience is required to stand a reasonable chance of passing a certification test.
- A complete list of C&SI certifications is available on the [program homepage](#).
