IBM zCloud Platform as a Service (PaaS) Offering Description

IBM zCloud Federal provides a holistic, modernized hybrid, multi-cloud ecosystem in a cost-effective, flexible "Z platform as a Service" that delivers robust, government security-rich, multi-tenant and single tenant solutions and fully managed production services that empowers and enables our clients' critical core missions.

zCloud provides a future-ready Mainframe Management, Migration and Modernization. Updates to technology take time, money and skills, limiting enterprise IT strategic options. Systems need to scale to peak usage, leading to on-premise overcapacity and increased costs. Disaster recovery is costly and often untested.

Through zCloud Federal's pay-per-use consumption and delivery model, clients can rapidly provision mainframe resources to meet changing capacity requirements, thereby optimizing their IT spend while taking advantage of IBM's FedRAMP High and DISA accredited secure Federal data centers.

Embracing the elasticity of a cloud-model, the zCloud Federal team works with clients at all stages of their cloud modernization journey, from initial journey mapping to transition to full application modernization with advanced containerization technology.

Why IBM and why IBM zCloud PaaS?
- Mainframe Experts - IBM has installed and provides managed services on over 400 mainframes worldwide
- FedRAMP High Accreditation - Workload is managed in IBM's FedRAMP High SmartCloud for Government Data Center
- Integrated services - Includes services like Remote Managed Mainframe Services (RMMS), private and public cloud options, are available regardless of clients' hybrid cloud configuration or current journey to cloud stage
- Cost Flexibility - Through IBM zCloud and its advanced virtualization with secured logical partitions (LPARS), clients reduce the CapEx associated with running their own data centers
- IBM Hybrid-Cloud Best Practices - Expertise to provide clients the talent and innovation across Research, Cloud, Cognitive, Systems and Services to solve challenges beyond the reach of commercial tools and repeatable service offerings
- Leaders in Data Analytics and AI - IBM zCloud has pre-existing assets and accelerators to help projects reduce time and risk and improve the ROI and business results

IBM zCloud Pricing March 2022

SIN	Item	PPA DESCRIPTION	GSA Price
518210C	0-500	zMIPS	$ 302.36
518210C	501-1000	zMIPS	$ 290.30
518210C	1001-2000	zMIPS	$ 270.11
518210C	2001-3000	zMIPS	$ 241.20
518210C	3001-4000	zMIPS	$ 220.23
518210C	4001-5000	zMIPS	$ 204.13
518210C	5001-6000	zMIPS	$ 192.21
518210C	per GB	zMemory	$ 7.33
518210C	per unit	zLPARS	$ 28,934.02
518210C	per GB	zStorage	$ 0.49
518210C	per GB	zStorage Replication DR	$ 0.46
518210C	per GB	zBack Up	$ 0.74
