

Technology Expert Labs for QRadar Suite SOAR

Whether you are new to IBM Security QRadar SOAR or have an existing installation you wish to expand, our Expert Labs team can provide a proven approach to optimization of incident response processes with a QRadar SOAR solution.

Business challenges

Security complexity continues to grow with the expanding threat landscape, growing attack surface, and volume and severity of alerts. The early decisions you make when responding to a security incident or cyberattack often make the difference between containment or crisis.

IBM QRadar SOAR is built to optimize your security team's decision-making processes. However, many organizations lack hands-on experience and access to standard practices and methodologies when working with QRadar SOAR, resulting in ineffective implementation and underutilization of these powerful tools.

Our technical and domain experts will assist you with your intelligent automation and orchestration objectives and effectively implement these technologies in order to improve their efficiency, ensure utilization of resources, and unlock the full potential of QRadar SOAR to help in achieving your business goals, such as:

- Implementing a stable and scalable architecture,
- Accelerating installation and deployment of new playbooks and workflows
- Delivering rapid time-to-value using hundreds of predefined rules, automation technology and out-of-the-box templates
- Applying best practice advice, tuning and optimization, and scaling guidance
- Maintaining a solid and compliant solution

What do we offer?

Getting Started Services

Use our team's SOAR expertise to guide and install your QRadar SOAR deployment, train your teams and provide a rapid return on your investment.

Optimizing Incident Response

Let us provide a comprehensive review of your QRadar SOAR deployment, including thoughtful analysis of use cases to meet complex requirements and improve incident response automation.

Expanding Incident Response

Engage our expert QRadar SOAR resources to help define priorities and goals for improving incident response and refine processes and procedures.

Ongoing Expert Guidance

Our team can provide regular, subscription-based guidance from our technical experts in all phases of design, deployment, operations, migration, upgrade and transformation, while building your own team's capacity and skill.
