

IBM Maximo Application Suite Accelerator Catalog

Accelerate your asset, maintenance
and reliability practices

Maintenance and reliability teams are challenged to balance uptime, reliability, and meeting sustainability goals with keeping costs low and optimizing resources. But there is no one size fits all approach across industries and geographies. Finding the content or solutions to make it easier to meet these goals can be a challenge. And for IT, integrating and managing point solutions to solve different business problems can be human and infrastructure resource intensive.

IBM Maximo Application Suite Accelerator Catalog enables maintenance, operations, and reliability specialists to discover solutions that can help them improve their business results. Without leaving the suite, users and administrators can browse a marketplace of solutions and content designed for IBM Maximo Application Suite. These solutions are developed by IBM and Business Partners to complement, extend, or enhance IBM Maximo Application Suite and help you improve time to value.

Highlights:

- A marketplace with content and solutions at your fingertips
- Accelerate use of IBM Maximo Application Suite
- Secure transactions powered by Red Hat® Marketplace

Maximo Accelerators come in a variety of forms, ranging from simple data files to versatile combinations of types and standalone applications.

Content

These accelerators encompass a wide spectrum of content, including configurations, dashboards, attachments, model templates and data loaded by a user through the UI.

Scripting and code patterns

These powerful resources empower users to automate scripts, DBC scripts, or custom code to automate tasks, load data, and other actions. Streamline processes, and unlock new functionalities within the system to Maximo a more versatile and efficient asset management solution ,

New applications

Find a wide array of solutions built using the Maximo Application Framework and designed to extend beyond the core Maximo applications, unlocking additional capabilities swiftly and optimizing their utilization.

Connectors

Connectors, which may function as standalone applications, are also part of the catalog. These connectors can include integration with the Maximo Application Suite (MAS) or provide data that users can seamlessly load into MAS, delivering a comprehensive set of capabilities and more.

A marketplace at the fingertips of users and administrators

In contrast to the majority of business solution marketplaces, our catalog of accelerators is seamlessly integrated into the IBM Maximo Application Suite. Each accelerator in this catalog is designed to empower users, IT teams, and administrators alike. You can easily explore the catalog based on the specific IBM Maximo Application it complements or by the provider's name. Each listing offers comprehensive details about the accelerator, including its compatibility with various versions of the Maximo Application Suite, along with convenient links to access documentation, company privacy policies, and additional resources.

Accelerate use of the IBM Maximo Application Suite

The accelerators featured in the catalog deliver tangible benefits to users by offering industry-specific functionality, expediting capability implementation, or enhancing the IBM Maximo Application Suite through seamless data integration. These accelerators encompass a wide range of content, from asset management enhancements and configurations to AI models, applications, integrations, and beyond. Their purpose is to empower users across various industries, assets, and roles, catering to a diverse array of use cases.

Why IBM?

IBM Maximo Applications Suite builds on decades of IBM leadership in assets and operations management. It is underpinned by IBM's deep commitment to data science and AI at enterprise scale, and its recognized leadership in IoT platform, hybrid cloud, and security.

IBM supports your organization's digital re-invention by providing the tools for new efficiencies, risk reduction, improved customer satisfaction, and the capturing of new revenue streams.

IBM's global ecosystem of Business Partners has a track record of delivering solutions in over 90 countries, including industry-specific solutions and add-ons that bring more rapid ROI for our customers. Only IBM has the investments, ecosystems, and experience to turn your assets and operations into a competitive advantage.

Secure purchasing powered by Red Hat® Marketplace

In the catalog, you'll discover a diverse selection of accelerators, including offerings from IBM and select business partners. While many accelerators are available at no cost, some may have associated fees. All accelerators will be available through the Red Hat® Marketplace. This marketplace offers responsive support, streamlined billing and contracting processes, simplified governance, and a unified dashboard view across multiple clouds.

IBM Maximo Application Suite Accelerators bring the innovation of the extensive IBM Maximo ecosystem, including partners and IBM teams, directly to the fingertips of users. Within the IBM Maximo Application Suite, professionals in asset management, maintenance, operations, reliability, and IT can explore a comprehensive catalog of content and solutions. This catalog empowers them to find tailored solutions that address their challenges, accelerate time-to-value, and drive tangible improvements in business outcomes.
