**IBM Technology Expert Labs**

Technology Expert Labs for QRadar Suite

Whether you are new to IBM Security QRadar Suite products or have an existing installation you wish to expand, our Expert Labs team can provide a proven approach to planning, installation, migration, upgrade or optimization of a QRadar Suite threat management solution.

Business challenges

Security complexity continues to grow with the expanding threat landscape, growing attack surface, and volume and severity of alerts that contribute to the urgency companies are facing to modernize. However, many organizations lack hands-on experience and access to standard practices and methodologies when working with QRadar Suite, resulting in ineffective implementation and underutilization of these powerful tools.

Whether you are concerned about a lack of skilled resources or want advice on how to get the most from QRadar Suite, our team provides guidance and assistance, encompassing the full product lifecycle from concept through support.

Our technical and domain experts will assist you with your Threat Management objectives and effectively implement these technologies in order to improve product efficiency, ensure utilization of resources, and unlock the full potential of QRadar Suite to help in achieving your business, goals such as:

- Implementing a stable and scalable architecture
- Accelerating installation and deployment of appliances
- Delivering rapid time-to-value using hundreds of predefined rules, automation technology and out-of-the-box report templates
- Applying best practice advice, tuning and optimization, and scaling guidance
- Ensuring a flexible, sustainable and cost-effective methodology which will accelerate your path to regulatory compliance
- Maintaining a solid and compliant solution

What do we offer?

Getting Started Services
Our team can help you accelerate deployment or migrate from your current system in order to provide a next-generation security intelligence platform using our well-defined strategies.

Optimizing Security Intelligence
Let us provide a comprehensive technical and operational review of your QRadar environment, make recommendations, suggest improvements and assist with tuning.

Expanding Threat Detection
Engage our expert resources to help define goals for improving your deployment, whether you are looking to automate threat detection, update your hardware or simply minimise support issues to maintain steady state.

Ongoing Expert Guidance
Our team can provide regular, subscription-based guidance from our technical experts in all phases of design, deployment, operations, migration, upgrade and transformation, while building your own team's capacity and skill.
