IBM Technology Lifecycle Services

BDA
DIE ARBEITGEBER

IBM delivers lifecycle support and services to BDA to help them Plan, Design, Deploy and Support their Cisco environment.

"In IBM, we have found the right partner. Highly professional and reliable to deploy Cisco's hyperconverged technology which is ideal for our IT requirements. With the HCI solution, we have a modern, scalable system and a single vendor for our networking, server and storage environment. Reliability and scalability in all directions are important factors for BDA IT strategy. All these requirements are perfectly covered by this solution. In addition to the technology, the professional consulting, services and support before, during and after the project provided by IBM team was very important for us to succeed in this project."

Martin Brünning – Head of IT BDA die Arbeitgeber

IBM

IBM Technology Lifecycle Services provided a designed solution with Installation, Configuration, Migration and Support Services, leveraging IBM technical expertise, tools, and methodologies.

The client is confident that the design of this project together with IBM is providing headlights into their Cisco environment.
The main solution benefits for BDA are:
- Operational and efficiency improvement
- Cost Savings
- Productivity improvement
- Scalability
- Reliability
