Introduction

Companies around the world and in multiple industries are finding an edge over competitors with SAP® HANA® running on IBM® Power® servers.

Through SAP HANA, organizations gain near-real-time operational insights that empower decision-makers to guide the enterprise to success. To deliver these game-changing insights, SAP HANA requires the right hardware platform. Without underlying IT infrastructure that can deliver on the demands of an in-memory database, SAP HANA environments can become complex to maintain—or worse, unstable.

To drive innovation, many organizations are kicking off their migrations to SAP S/4HANA®, the next-generation ERP solution built on SAP HANA. As a result, they are unlocking new flexibility, performance, and reliability, contributing directly to their competitive edge.

In this eBook, you will find examples of how choosing IBM Power for SAP HANA translates into tangible outcomes that include faster expansion, higher efficiency and rapid innovation.

Industry: Automotive

AUDI AG

Increases innovation, speed and agility

Drivers around the world know Audi for its beautiful, high-quality premium cars — which in the past were mostly built around the internal combustion engine. Yet consumers, legislators and the company increasingly favor electric cars. How can premium car manufacturer Audi pivot to increase the share of plug-in hybrids and battery electric vehicles within its lineup? With help from SAP HANA supported by IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications and IBM® AIX®).

[Read the full case study](#)

Powers more demanding business processes while using 66% fewer servers

Loading for advanced analytics is now 100x faster than typical speeds

Moving to SAP HANA reduced the database size by 50%

“With IBM Power systems, we’re building on proven technology. To maximize continuous manufacturing output, a stable platform is crucial for our business.”

Audi representative

Industry: Automotive

Honda Pakistan

Lifts customer satisfaction

Honda Pakistan wants to build a stellar reputation for after-sales customer experience, which includes supporting dealerships with super-rapid delivery of spare parts for vehicle servicing. To drive progress, Honda Pakistan is moving to real-time planning insights based on SAP S/4HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM FlashSystem® storage.

[Read the full case study](#)

80% acceleration in planning process for spare parts

15% increase in dealership revenues predicted

50% smaller data center footprint compared to x86 solutions

“We saw that we could achieve the same levels of performance with just three IBM Power H922 servers, compared to six physical servers in an equivalent x86 infrastructure.”

Muhammad Ali, General Manager IT, Honda Pakistan

[Back to contents page](#)

Industry: Automotive

Hyundai Nishat Motor (Private) Limited

Disrupts the Pakistan auto market

Hyundai Nishat Motor (Private) Limited looked for critical advantage to win customers in Pakistan. With SAP S/4HANA supported by IBM Power servers running SUSE Linux Enterprise Server for SAP Applications and IBM Storage, the company can deliver vehicles up to 66 percent faster than the national average.

[Read the full case study](#)

Up to 66% faster new vehicle deliveries

Offers 50% lower total cost of ownership and maintenance

Up to 8x capacity for future growth

"Thanks to industry best practices from SAP and high-performance infrastructure from IBM, we're ready to carve out a niche position in a very competitive market."

Shuja ur Rahman, Head of IT, Hyundai Nishat Motor (Private) Limited

[Back to contents page](#)

Industry: Automotive

Sona BLW

Clicks into gear

Sona BLW makes precision gears and driveline technologies for cars, with production spanning two continents, relying on just-in-time manufacturing. To optimize its critical supply chains, Sona BLW implemented SAP ERP powered by SAP HANA on IBM Power servers (running IBM AIX and SUSE Linux Enterprise Server for SAP Applications) and IBM Storage, helping it identify and analyze its performance, and tune up its business results.

[Read the full case study](#)

Sona BLW deployed SAP ERP powered by SAP HANA, supported by cost-efficient, high-performance IBM Power servers and IBM Storage.

[Back to contents page](#)

Fully integrating supply chains with finance and operations

Increased efficiency and cut operational costs

Impressed Sona BLW's group headquarters team in Germany

Asahi Kasei Group

Grows business opportunities

Expanding fast, Asahi Kasei Group was looking for ways to streamline and optimize its back-office IT systems. How could it support growth without the cost and complexity of infrastructure refreshes? Asahi Kasei developed a scalable platform that transforms operational agility by migrating to IBM Power servers running SUSE Linux Enterprise Server for SAP Applications.

[Read the full case study](#)

Flexibility to manage ad-hoc, peak and planned growth

Reduces operational costs and total cost of ownership

Greater system performance from with a single easy-to-manage system

“The flexibility and availability of SAP HANA on IBM Power systems has become a powerful way to promote the company’s ambitious information strategy.”

Mr. Suzuki, Corporate IT Management, Asahi Kasei

[Back to contents page](#)

Industry: Chemicals & Petroleum

India Glycols

Enhances production efficiency

India Glycols wanted to improve manufacturing and business efficiency, but in an app-driven world its users were stuck with inflexible legacy systems. By moving to SAP S/4HANA powered by IBM Power servers running SUSE Linux Enterprise Server for SAP Applications, India Glycols is enabling digital transformation based on robotic process automation, AI and SAP Fiori apps.

[Read the full case study](#)

80% faster delivery of standard financial reports

91% reduction in time taken to retrieve order-to-pay reports, down from 12 minutes to 60 seconds

Critical materials requirements planning information available daily

“With SAP S/4HANA supported by the performance of the IBM Power servers, building a KPI-driven performance management solution is now a realistic, focused aim.”

Atul Govil, Chief Transformation Officer & Head (SAP & IT), India Glycols

[Back to contents page](#)

Supreme Petrochem

Innovates and boosts productivity

To win market share, Supreme Petrochem Limited (SPL) aimed to extend its product range and boost production capacity, while reducing environmental impact. By moving critical applications to SAP S/4HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications), IBM FlashSystem and Cisco network switch solutions, SPL gains rapid insight into operational efficiency to drive growth.

[Read the full case study](#)

Boosts sales with automated online order processing and payments system

85% reduction in time taken to complete month-end reporting, reduced from one week to a single day

>60% faster system restart processes help streamline IT system administration

"Where other vendors proposed multiple servers to support our SAP workloads, IBM showed that their solutions could house our production workloads, applications, our database and a development environment on just one server."

Hemant Pandit, Head of IT, Supreme Petrochem

[Back to contents page](#)

Industry: Chemicals & Petroleum

Vivo Energy

Fuels future growth by boosting efficiency

Vivo Energy is a leading fuel retailer in high-growth African markets. The company engaged IBM Services® to implement SAP S/4HANA, powered by IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage, with SAP SuccessFactors®, SAP Cloud for Customer and SAP Integrated Business Planning, creating an intelligent enterprise.

[Read the full case study](#)

Transforms Vivo Energy's ability to launch new initiatives, slashing time-to-value

Boosts data analysis capabilities, giving granular insight into operations

Drives automation boosting efficiency and freeing employees to spend more time on value-add tasks

"We are deploying SAP S/4HANA on IBM Power systems for the growth avenues that it opens. We are still at the start of this process, but it is clear that SAP S/4HANA on IBM Power systems will be the foundation for our future development."

Mike McCormick, CIO, Vivo Energy

[Back to contents page](#)

Industry: Computer Services

Bulutistan

Offers a managed private cloud

Enterprises across Turkey are in the midst of digital transformation, moving to SAP HANA solutions to gain deep business insight. To help clients achieve maximum benefit, managed service provider Bulutistan created a high-performance private cloud for SAP S/4HANA, based on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage.

[Read the full case study](#)

100% performance boost compared to equivalent x86 server platform

100% availability to date ensures mission-critical SAP solutions are always online

100% client satisfaction helps to attract new business and drive growth

“100 percent of businesses using the IBM and SAP platform have told us they’re very happy with the service. Our cloud solution is helping our clients do more with less, save time and money on maintenance, and nurture customer satisfaction through seamless, always-on services.”

Begim Başlıgil, Co-Founder, Bulutistan

[Back to contents page](#)

Industry: Computer Services

Ctac

Snaps up fresh market opportunities

The IT services market is notoriously crowded, with competitors jostling for share, but Ctac has a trick up its sleeve. IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage enabled Ctac to launch new hosting services at ultra-competitive rates—including the next-generation SAP S/4HANA solutions—backed by outstanding SLAs to win new business.

[Read the full case study](#)

“We believe that IBM Power servers and IBM Storage provide key competitive advantages for us as a hosting provider.”

Hans Gootjes, Enterprise Architect and Cloud Business Developer, Ctac

[Back to contents page](#)

**Reduced footprint with 96 logical partitions
across 10 physical servers**

8 hours per month to manage each compute block

2.6 kilowatts consumed by each server

Dedagroup

Helps clients grow to new heights

Managed services provider Dedagroup introduces an innovative cloud platform, based on SAP HANA and IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications), giving clients on-demand access to the fast, flexible IT resources they need to run better businesses—all at a competitive price.

[Additional information](#)

Boosts competitiveness with powerful and innovative cloud services

40–50% customer base growth by offering a cutting-edge platform at an attractive price

Accelerates time-to-market for new services and solutions

“With SAP HANA running on IBM Power systems, we offer a unique proposition to our clients that can really transform their businesses.”

Simone Armari, Solution Architect and Presales Manager, Dedagroup

[Back to contents page](#)

Industry: Computer Services

D.FI

Powers digital transformation

Digital transformation helps businesses innovate fast to meet customer demands. It can strain on-premises systems to their limits. For businesses that depend on instant insight without their transactional systems missing a beat, D.FI offers in-memory SAP HANA solutions on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications). Fast, flexible, scalable—it's innovation as a service.

“By using our SAP HANA cloud service running on IBM Power systems, organizations in any industry can achieve faster insight into their performance.”

Jérôme Marchal, Offering and Solution leader, D.FI

[Back to contents page](#)

20% rise in performance helps transform business systems into engines of value creation

20% reduction in total costs thanks to economies of scale

Cloud solutions ease pressure on capital, enabling flexible capacity as demands change

Industry: Computer Services

NTT DATA Business Solutions Nordics

Reinforces its market-leading position

To spice up its SAP hosting services, NTT DATA Business Solutions Nordics deployed IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage that can be securely shared between clients—helping to deliver top performance and reliability at enticing rates.

[Read the full case study](#)

60% faster provisioning of new virtual servers

30% reduction in operating costs

95% time saving on reporting for one client

“Deploying IBM Power systems and IBM Storage has been transformational for our business—our offering has grown to the extent that we are now able to expand into new markets and reach new customers.”

Torben Prang, Director of IT and Infrastructure, NTT DATA Business Solutions Nordics

[Back to contents page](#)

Industry: Computer Services

NTT DATA Business Solutions Poland

Seizes competitive advantage

By running SAP ERP powered by SAP HANA hosting services on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM FlashSystem storage, NTT DATA Business Solutions Poland can offer first-class SLAs at ultra-competitive prices, shaking off the competition.

[Read the full case study](#)

Accelerates provisioning of new client systems from two days to a few hours

Reduces operational costs, helping NTT DATA Business Solutions Poland to undercut rivals' fees

Slashes latency by a factor of five to deliver stellar service to clients

“IBM Power systems and IBM FlashSystem enable us to offer outstanding SAP solutions and our world-class SLAs at very commercially attractive fees.”

Ireneusz Pelka, SAP Basis Senior Consultant and PowerVM Expert, NTT DATA Business Solutions Poland

[Back to contents page](#)

OEDIV

Streamlining customer service with automated private cloud

For more than 25 years, OEDIV has relied on IBM® Power® systems to help provide scalability, security and reliability for hundreds of customers, using hosted, private cloud, multicloud and hybrid cloud architectures. Particularly for the small- and medium-size business sector, OEDIV's service enables access to powerful SAP applications running on IBM Power.

[Read the full case study](#)

25% cost savings for SAP S/4HANA on IBM Power

200 hours saved each month through automation of key tasks on IBM Power

15% performance boost with Power10

“Using the latest Power10 processors and IBM Power Private Cloud with Shared Utility Capacity, we achieved up to 25% cost savings for SAP HANA on IBM Power. With IBM PowerVC and Red Hat Ansible Automation Platform, we can provision systems more efficiently and 20%–30% faster.”

Dominik Münch, Team Manager - Power & Operating System Center
OEDIV

[Back to contents page](#)

Industry: Computer Services

PROMOS

Helping property managers

PROMOS supports property management companies with a full range of business and IT consulting, development, and implementation services. To operate with flexibility, extend capabilities, and boost business agility, PROMOS implemented SAP S/4HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage, helping streamline operations and increase profitability.

[Read the full case study](#)

80% fewer servers streamlines operations and optimizes infrastructure investments

50% faster access to actionable insights despite growing data volumes

25% better business application performance during peak times

“Running SAP S/4HANA on IBM Power systems provides our clients with a simplified IT landscape and a future-proof solution that we can adapt and scale to meet business requirements.”

Volker Schulz, CIO, PROMOS

[Back to contents page](#)

rku.it

Keeping the lights on and public transport moving

Private cloud provider rku.it GmbH, supports modernization and digital transformation at municipal utilities, public transport organizations and local government clients. By running SAP HANA® and SAP S/4HANA® solutions on IBM Power servers, in combination with the Red Hat® Ansible® Automation Platform, rku.it delivers cost-efficient, fast and reliable IT services to support essential public services for millions of citizens across Germany.

[Read the full case study](#)

3x faster provisioning for new instances

50% reduction in database administrators after moving to AIX on IBM Power

Flexibility to increase their total memory per core by a factor of 4.8 to support the growing number of SAP HANA instances

“IBM Power has proven to be the most flexible and cost-efficient platform for our demanding SAP HANA database and SAP S/4HANA application workloads.”

Benjamin Kaspereit, Head of Data Center Systems Technology, rku.it GmbH

[Back to contents page](#)

Industry: Computer Services

SEIDOR

Sparks double-digit growth

To maintain its hard-won market-leading position, SEIDOR needed to satisfy customers' appetites for enhanced flexibility and easy IT management at a competitive price point. SEIDOR deployed the SAP HANA database on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and launched the solution as a cloud-based pay-per-use platform.

[Watch the video](#)

Over 70 customers and 3,500 users have already signed up to the new cloud service

Double-digit growth expectations

Delivers top-quality, cost-effective services for clients

“Today our SEIDOR Cloud manages more than 70 clients and over 3,500 users, and we expect double-digit growth in this part of the company.”

Santiago Anguera, Deputy Director General, SEIDOR

[Back to contents page](#)

Syntax

Empowers manufacturers to deliver on time, every time

To offer manufacturing enterprises stability and round-the-clock access to critical SAP S/4HANA® systems, managed service provider Syntax uses cutting-edge IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) to create a rock-solid private-cloud platform for logistics success.

[Read the full case study](#)

2+ years of perfect reliability for critical cloud services, strengthening Syntax's reputation

Ensures smooth business operations for clients, nurturing long-term loyalty

>200,000 business users supported on a single platform, with scalability for future growth

"Customers always want faster data analytics. With IBM Power systems, we can offer tailored solutions to provide the latest in-memory technology and enable real-time business insights."

Marco Eitzer, Director IT Operation, Syntax

[Back to contents page](#)

Industry: Computer Services

System Design Analysis, Inc.

Builds the road to SAP S/4HANA

With SDA as their technology architect, a large Canadian city and a large Canadian retailer chose IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage systems to support SAP S/4HANA.

[Read the full case study](#)

4 out of 5 SDA clients chose IBM Power and Storage systems when deciding to move to SAP HANA

50% footprint reduction by using IBM Power servers to manage SAP workloads (compared to other systems)

Ready to meet 2027 SAP S/4HANA migration deadline by delivering the higher levels of performance required

“We pride ourselves on being objective. But IBM ends up being the best option or one of the best options when we make recommendations to clients.”

Sean Shea-Schrier, SAP Technology Architect and Partner, SDA, Inc.

[Back to contents page](#)

Techwave Hungary

Drives digital transformation

From automation on factory production lines to seamless retail experiences on mobile devices, digital transformation is empowering innovation faster than ever before—and for Techwave Hungary’s customers, managed SAP solutions are a key enabler. To keep its management requirements, lean, Techwave Hungary deploys SUSE Linux Enterprise Server for SAP Applications across its IBM Power infrastructure.

[Read the full case study](#)

1,000 person-hours per year saved on systems management, freeing time for value-added customer services

Keeps operational costs lean so Techwave can offer SAP solutions at a competitive price point

Delivers high availability, helping to meet rigorous service-level agreements for mission-critical SAP workloads

“Thanks to IBM and SUSE, we have created an ultra-scalable and highly resilient virtual private cloud to help our customers unlock the game-changing analytics capabilities of SAP S/4HANA”

Gabor Lesti, CIO, Techwave Hungary

[Back to contents page](#)

UMB

Transforms business capabilities

As enterprises harness business data to drive smarter, faster decision-making, they rely on high-performance, cost-effective analytics. To support its clients, IT service provider UMB offers a cloud solution delivering SAP HANA as a service, enabled by IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications, IBM AIX, and IBM i), delivering seamless scalability for analytics workloads.

[Read the full case study](#)

25% less expensive to run over a five-year period than alternatives

60% faster restarts running mission-critical SAP HANA databases on IBM Power

Boosts competitiveness with innovative SAP HANA cloud services

“Using IBM Power, we can easily vertically scale SAP HANA and SAP S/4HANA systems to 3 TB and way beyond with a single instance. On other architectures, we would need to set up clusters which would increase complexity and costs substantially.”

Mathias Lang, Head of SAP, UMB AG

[Back to contents page](#)

Industry: Consumer Products

Aryzta

Helps customers make informed choices

Consumer habits are changing, with people paying greater attention to the ingredients in the food they buy. To provide supermarkets and restaurants with detailed ingredients sourcing information, Aryzta worked with Freudenberg IT (FIT) and IBM to deploy SAP HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) in a private cloud, for rapid data analytics.

[Read the full case study](#)

75% faster drill-down reporting for executives, from 40 to 10 seconds

95% improvement in ETL processes for cost of goods calculations

Over 30% reduction in TCO from choosing IBM Power servers over an appliance model

“SAP and IBM technologies are key enablers for providing highly detailed product information that consumers now expect. With SAP HANA hosted by FIT on IBM Power systems, Aryzta is building a stronger understanding of consumer behavior.”

Anoop Mohan, Division Vice President of IT, Aryzta

[Back to contents page](#)

BRF

Boosts business agility

Launching operations across the globe, Brazil-based food producer BRF has expanded rapidly over the past decade. To improve application performance and ensure compliance with new Brazilian regulations, the company migrated its SAP ERP environment to SAP HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage solutions.

[Read the full case study](#)

Up to 98% acceleration in processing of financial reports

62% reduction in storage space

Supports compliance with new Brazilian labor and tax regulations

“Whatever the future holds, we know that IBM Power systems and IBM Storage are well-equipped to handle growing workloads and maintain the agility that we need for continued global expansion.”

Everton Cardoso, Global IT Consultant, BRF

[Back to contents page](#)

Industry: Consumer Products

Colgate-Palmolive Pakistan

Slashes time-to-insight

Colgate-Palmolive Pakistan's iconic products bring bright smiles and clean clothes. In order to strengthen its capabilities, the company upgraded its SAP ERP applications and migrated to the SAP HANA database, powered by IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications).

[Read the full case study](#)

Up to 85% time saving on reporting

50% cut in storage capacity requirements

25% reduction of physical server footprint

"Colgate-Palmolive Pakistan selected IBM Power systems based on a combination of competitive price, superior value, system performance, reliability and support."

Ahmed Rehmani, IT Director, Colgate-Palmolive Pakistan

[Back to contents page](#)

Industry: Consumer Products

Colombina S.A.

Creates a perfect recipe for growth

To build its brands, food producer Colombina knows that helping its retail clients find their optimal mix of products will drive sales. Switching to SAP S/4HANA using IBM Rapid Move from IBM Services will empower Colombina to put the right product mixes on every shelf—delighting customers and creating the perfect recipe for future growth.

[Read the full case study](#)

12x faster plant planning and management reporting

Identifies optimal product mixes, helping retailers boost sales

8% increase in revenues, building Colombina's brands and driving growth

“Our work with IBM will empower us to optimize the inventories of hundreds of retail clients, helping both Colombina and its partners to boost sales and grow revenues.”

Jesus Antonio Brand, CIO, Colombina

[Back to contents page](#)

“With SAP ERP and SAP HANA solutions running on IBM Power E980 servers together with IBM Storage, we’ve gained a cost-efficient, scalable platform to continue our digital transformation.”

Evandro Donel Foster, IT Supervisor, C.Vale

[Back to contents page](#)

Industry: Consumer Products

C.Vale

Produces better food for Brazilians

C.Vale trusts SAP ERP applications to run its food and distribution operations efficiently. To power new applications and analytics, C.Vale moved to IBM Power E980 servers (running SUSE Linux Enterprise Server for SAP Applications and IBM AIX) and IBM Storage, boosting compute capacity by 42 percent while cutting operational costs by 23 percent, all designed to produce better food for Brazilians.

[Read the full case study](#)

42% increase in compute resources

23% reduction in monthly compute costs

Up to 19% faster SAP ERP application response times

Electrolux

Innovates to bring comfort to homes

To help us lead more comfortable lives, home appliance specialist Electrolux is on a mission to innovate, with smarter products manufactured at lower environmental impact. To enable faster, data-driven decision-making, Electrolux moved its mission-critical SAP HANA solutions to high-performance IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM FlashSystem storage.

[Read the full case study](#)

Supports business growth with a scalable platform for demanding SAP HANA workloads

30% reduction in disaster recovery infrastructure costs, freeing up resources for innovation

75% faster recovery times protect against downtime with a 4-hour Recovery Time Objective (RTO)

"IBM Power systems offer enhanced scalability over the long term and avoid the cost and disruption of having to regularly refresh our IT infrastructure."

Spokesperson, Electrolux

[Back to contents page](#)

Industry: Consumer Products

General Milling Corporation

Creates the perfect recipe for growth

General Milling Corporation looked to reduce costs and increase efficiency. To harness the full power of its core business systems, GMC engaged IBM and Questronix to deploy SAP S/4HANA on IBM Power H922 servers (running SUSE Linux Enterprise Server for SAP Applications and IBM AIX) and IBM FlashSystem storage.

[Read the full case study](#)

80% faster month-end closing by accelerating consolidation from over 30 days to just three

Enhances inventory management, reducing waste and improving cost-efficiency

Lays the foundation for big-data analytics initiatives, enabling future process improvements

“We’re building a strong digital foundation for our long-term growth goals on IBM Power servers and IBM FlashSystem storage.”

Tessie Ricafort, SAP Administration, General Milling Corporation

[Back to contents page](#)

Groupe Chantelle

Re-invents its consumer business model

In response to consumer demand for sustainability and a dramatically changing retail landscape, Group Chantelle is re-inventing its lingerie business. The company chose IBM® Power servers (running SUSE Linux Enterprise Server for SAP Applications and IBM i) and IBM FlashSystem servers to create a flexible, high-performance platform for SAP solutions that will drive omnichannel digital transformation.

[Read the full case study](#)

25% boost in per-core performance enables greater responsiveness to customers

25% increase in price-performance accelerates returns on IT investments

Enables agile decisions about future IT, contributing to competitive edge

“Our IBM Power systems and IBM FlashSystem environments add to our flexibility—and therefore our competitive edge—by enabling us to place workloads wherever it makes the most sense to run them.”

André Wei, CTO, Groupe Chantelle

[Back to contents page](#)

Industry: Consumer Products

Itambé

Gears up for explosive growth

Itambé produces dairy goods for thousands of stores across Brazil. Could the company ensure totally fresh deliveries, even as business grew? Or would rising transaction loads leave a sour taste as systems struggled to cope? Thanks to IBM Power servers (running IBM AIX) and SAP, Itambé is achieving record sales and the crème de la crème of operational efficiency.

[Read the full case study](#)

30% cut in time for customer billing

Faster delivery of monthly management reports

USD 2,270 saving per month on electricity bills

“The state-of-the-art IBM infrastructure provides a solid foundation for our mission-critical SAP applications, and helps us keep our booming business running smoothly and efficiently.”

Evaldo Pereira, IT Infrastructure Coordinator, Itambé

[Back to contents page](#)

I-D Foods

Plucks ripe, real-time insight

Business processes that served family-owned I-D Foods in the past were now strained to the breaking point and bursting at the seams. How could the company streamline and optimize operations to make huge growth a reality? Using SAP S/4HANA, IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications and IBM AIX) and IBM Storage, I-D Foods is transforming its business to deliver better customer service.

[Read the full case study](#)

6x faster transfer of customer orders to I-D Foods expected via new mobile app

Days saved on warehouse processes will drive faster fulfilment of customer orders

87.5% smaller physical footprint will result in lower hosting fees

“SAP S/4HANA running on IBM Power systems and IBM Storage paves the way for future growth and for us to take our company in any new direction we choose.”

Michael Issenman, CTO, I-D Foods

[Back to contents page](#)

Industry: Consumer Products

PT. Diamond Cold Storage

Finds the coolest way to run SAP HANA

PT. Diamond Cold Storage supports integration with leading-edge mobile and IoT solutions running on IBM Power servers when it joins forces with InfoTech to upgrade its SAP ERP solution to the SAP HANA in-memory database.

[Watch the video](#)

Enables the launch of mobile technologies, boosting efficiency and cutting costs

Supports speed-of-thought analytics, driving smarter decision-making

Paves the way to automated, ultra-efficient operations

“I am very confident that with the support of SAP HANA on IBM Power8, I can look forward to a lot of growth in my future business.”

Norman Chen, Managing Director, PT. Diamond Cold Storage and PT Sukanda Djaya

[Back to contents page](#)

Química Amparo

Washes away the competition

Cleaning-product manufacturer Química Amparo aims to double its Brazilian market share – but how could it find the most promising growth opportunities? By migrating its SAP HANA applications to IBM Power server solutions (running SUSE Linux Enterprise Server for SAP Applications), Química Amparo gains access to lightning-fast reporting and rich customer insight, helping to build a bright new future.

[Read the full case study](#)

Up to 30% faster reporting cuts time-to-insight

Lower TCO than comparable x86 servers over five years

30% cut in time spent on server administration

“We chose IBM Power servers because they offer excellent long-term value for money.”

Leandro Taveira da Silva, IT Manager, Química Amparo

Vishal Mega Mart

Transforms business processes to deliver excellent user experiences

Indian fashion and goods retailer Vishal Mega Mart was experiencing a record number of transactions, especially during peak festival periods such as Durga Puja and Diwali. To grow with increased demand and keep customers coming back for more, the retailer transformed the core systems powering its business with super-scalable technology.

[Read the full case study](#)

50% faster generation of business-critical reports, streamlining supply chain processing

30% increase in revenue over the festival period

68% reduction in data center power consumption

“The dynamic functionality of SAP HANA backed up by our powerful IBM hardware makes stepping into the future of retail a comfortable transition.”

Gagan Sharma, Senior Manager, Vishal Mega Mart

Industry: Retail

WMF Group

Cooks up data-driven insights

When you sip a foamy cappuccino at a luxury hotel, there's a fair chance your beverage was made by a WMF coffee machine. To spur innovation while keeping production running, WMF Group shifted its SAP ERP applications to the latest IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications and IBM AIX) and IBM FlashSystem solutions and migrated its SAP Business Warehouse solution to SAP HANA.

[Read the full case study](#)

**18-times faster report generation
reduces time-to-insight**

**20% time saving on backups and system restores
boosts business resiliency**

**79% reduction in database size
accelerates backups by 20%**

"The immense power from the IBM hardware and the SAP HANA database mean that we can analyze data at a more granular level. The insights we gain are much more detailed, and we spend less time aggregating data."

Jörg Heinen, CIO, WMF Group

Industry: Telecommunications

CenturyLink

Supports strategic transformation

Seeking higher net income through revenue growth, CenturyLink needed to move faster on the integration of corporate acquisitions and the creation of new services. By migrating business-critical financial information systems to SAP HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications and IBM AIX), the telco accelerated the onboarding of a major acquisition.

[Read the full case study](#)

64 times quicker completion of some financial transactions

1.57 times faster cost allocation during month-end close

60% reduction in SAP database size enables faster backup and recovery

Della Volpe

Delivers the goods on time, every time

Managing millions of deliveries each month demands diligent planning and the ability to adapt to ever-changing customer needs. Road cargo specialist Della Volpe enhanced core capabilities by co-deploying SAP Transportation Management with SAP S/4HANA on IBM Power servers (running SUSE Linux Enterprise Server for SAP Applications) and IBM Storage as an SAP S/4HANA Tailored Datacenter Integration.

[Read the full case study](#)

75% reduction in data center footprint

Boosts system capacity while increasing application performance and flexibility

Eliminates time-consuming system administration, enabling staff to focus on adding value

“IBM Power servers and IBM FlashSystem® storage have revolutionized the way we manage the core applications that support our daily activities. We are now free from administration and have time to work on value-add activities.”

Alexandre Prudente, SAP Infrastructure Manager, Della Volpe
