

IBM Cloud Offerings – Cloud Management Platform - SIN 518210C

IBM Cloud Management Platform (CMP) SaaS

The IBM Cloud Management Platform (CMP) provides dynamic, secure multicloud management through a single-pane of glass and/or set of APIs. CMP assists Federal Government customers with creating a hybrid multicloud ecosystem by building, managing, monitoring, governing, and decommissioning their multicloud enclaves. With the ability to view their organization's private, community, public and hybrid (including on-premises) cloud environments, end-users provision, automate, orchestrate, operate, bill, charge back, and tear down servers and services across CMP supported Cloud Service Providers (CSPs). Organizations establish policies, quotas, and service catalog(s) that are enforceable based upon definable criteria depending on environment and/or organization type. The CMP offering is part of IBM's core federal hybrid and multicloud management tool suite that resides within the secure, accredited enclave of the IBM SmartCloud for Government (SCG). Accredited at both DISA DoD Impact Level (IL) 5 and FedRAMP High, it can be interconnected with other cloud environments at or below those levels. The CMP supplements IBM's SCG and associated Multi Cloud Managed Services for Government (MCMS-G) by providing a holistic system view and enhanced management construct across hybrid and multicloud implementations.

CMP Pricing Model WITH IFF			
	Type	Units	Price
Set Up Charge	OTC	1	\$34,911.84
Service and Adapter Fee	Monthly	Use Matrix below and base on number of users and adapters to determine fee	
VMS Under Mgmt	Monthly/VM	1	\$12.22
