

IBM Planning Analytics 2.0.9.1 LC - Fix List

Component	APAR	Description
General Product	<u>PH02777</u>	Assign password has a problem in some cases
	<u>PH12646</u>	Tm1p.ini parameter removed after closing Architect
	<u>PH17766</u>	Cognos Insight: there are members to display in a view, but receiving "no members can be displayed" error
	<u>PH18860</u>	Excel with radio buttons grouped are not working as expected after migrating from 2.0.5 to 2.0.8
	<u>PH19419</u>	Unable to reject node with special character (colon) - an unexpected error was generated by a TurboIntegrator process
	<u>PH19443</u>	Incorrect parameter in Cognos Configuration, fails to configure tm1AdminTLSCipherList
	<u>PH19506</u>	Planning Analytics 2.0.8 LC recalculations of worksheets fail with error '32809': application defined or object defined error
	<u>PH20244</u>	Performance Modeler crashes when scrolling on high resolution screens
	<u>PH20417</u>	Performance Modeler rule/feeder analysis report does not generate if alias used in ATTRN rule
	<u>PH20598</u>	Unable to create snapshots via Print Report feature in Perspectives, blank error with yellow triangle appears
	<u>PH20791</u>	Excel crash when trying to move or copy a sheet with Action Button to a new book
	<u>PH21257</u>	Drop-down list is not working in Perspectives
	<u>PH21262</u>	Values replace the DBRW formulas
	<u>PH21471</u>	Active form in Perspectives returns results using cube dimension order regardless of dimension order selected in the cube view
	<u>PH22044</u>	Performance issue opening a sheet using an Action Button with advanced options

Component	APAR	Description
Server	<u>PH02269</u>	TurboIntegrator processes are running slower in Planning Analytics compared to 10.2.2 FP7
	<u>PH03736</u>	Defunct sharememreader process causes logging from wrong TM1 Server instance
	<u>PH04747</u>	TM1 Server crash using CubeCreate
	<u>PH05685</u>	MDX query with calculated member does not return value when using zero suppression on non-empty values
	<u>PH07601</u>	Server crash AssignCommitActionLog
	<u>PH10385</u>	TurboIntegrator processes taking almost twice as long after migration to cloud
	<u>PH10679</u>	Architect: TM1 Server goes into a hung state after adding one user to security
	<u>PH12134</u>	TM1 Server crash - dbstginitializeaxesconsolidationdata - dbstgcalculateaxesconsolidations - stargatecreationprocess
	<u>PH12386</u>	TM1 Server crash on shutdown terminating unregistered clean up thread
	<u>PH12955</u>	Running MDX queries against Planning Analytics 2.0.6 server runs slower and consumes much more memory than TM1 10.2.2
	<u>PH13522</u>	TM1 Server crash caused by fetching a calculated value in rule when UseStargateForRule=T
	<u>PH14854</u>	Deep consolidation in rule causing a crash in 2.0.7if3
	<u>PH14967</u>	Incorrect handling of TM1Chore names for TM1Top reporting causes a crashCrash in Planning Analytics
	<u>PH15381</u>	2 0 6 I F 1 7 TM1 transaction log delta, REST API request fails to pull changed values
	<u>PH15645</u>	TM1 Server memory high while running running chore that creates elements
	<u>PH15813</u>	TM1 Server crashes when chore does not complete
	<u>PH15941</u>	Incorrect statistics captured in }statsbycube when multi-threaded parameters are turned on
	<u>PH16311</u>	INSTR MDX function doesn't work correctly within an MDX statement
<u>PH16388</u>	User defined consolidation crash with PullInvalidationSubsets	

Component	APAR	Description
	<u>PH16608</u>	TM1 Server crash deleting cell set during async session
	<u>PH16797</u>	TM1 Server crash: due to an MDX post HTTP request - invalid pointer
	<u>PH17351</u>	When using securitypackagename=kerberos in Tm1s.cfg, NTLM authentication is still allowed via REST API
	<u>PH17354</u>	Tm1top.exe - crashing when not entering a password while running from command line
	<u>PH17465</u>	Data load TurboIntegrator process performing slower in Planning Analytics than 10.2.2
	<u>PH17631</u>	TurboIntegrator process doesn't appear as correct in Architect/Perspectives if corrected/compiled by REST API
	<u>PH17703</u>	Chore execution timing is altered intermittently.
	<u>PH17888</u>	Typo in the new element maintain_detailed_feeder_memory_stats in cube }cubeproperties
	<u>PH18032</u>	Unable to input data - spread total zero error
	<u>PH18104</u>	Republish upgraded Excel report creates new blb file in }externals rather than overwriting existing file
	<u>PH18157</u>	Loading attributes within a TurboIntegrator process in Planning Analytics is much slower than older TM1 versions (10.2).
	<u>PH19079</u>	TM1 Server crashing if there is a file that the server cannot open
	<u>PH19148</u>	TM1 Server crashes on creating an attribute-based hierarchy from Planning Analytics Workspace
	<u>PH19306</u>	Data Admin is not able to create new TurboIntegrator processes in Planning Analytics Workspace
	<u>PH19323</u>	IXC lock contention on dimensions the first time two concurrent processes are creating views and subsets
	<u>PH19352</u>	Server crash in stargatecreationprocess::finalizeincatchblock()
	<u>PH19490</u>	Slow performance doing data entry as Admin when view contains hierarchies
	<u>PH19605</u>	TM1 Server is crashing when REST API is combined with runprocess

Component	APAR	Description
	<u>PH19612</u>	TM1 Server crash with Tm1top when scan time is changed and thread terminated
	<u>PH19628</u>	TM1 Server crash during SaveDataAll with a User Defined Consolidation
	<u>PH19697</u>	TM1 Server crash building canonical URL
	<u>PH20035</u>	Process error log file entry in Planning Analytics 2.0.8 - sf_DeleteFile: Error on file
	<u>PH20047</u>	Planning Analytics for Excel: generating some views a second time requires an extreme amount of time
	<u>PH20241</u>	TM1 Server crash with circular reference
	<u>PH20283</u>	Chore editor deletes DST settings using REST API
	<u>PH20503</u>	TM1 Server crash Planning Analytics 2.0.8 IF 6 due to session management
	<u>PH20695</u>	TM1 Server crash - traversefiltered1tree - traversefiltered - stargate - sliceragggregator - calcaxiselement
	<u>PH20824</u>	TurboIntegrator loading .csv file with quotes results in additional columns
	<u>PH21017</u>	TM1 Server crashes due to memory corruption
	<u>PH21061</u>	Multiple threads creating i18nlocale objects at the exact same time causes lock contention on critical section in CCL
	<u>PH21199</u>	TM1 Server crashes due to tm1memberset memory corruption
	<u>PH21458</u>	Missing entry in audit log for REST API log in/out
	<u>PH22255</u>	Dimension picker is slower on Planning Analytics 2.0.9
	<u>PH22585</u>	POST ExecuteMDX request never completes causing lock contention for other threads
	<u>PH22645</u>	TM1 Server crashes due to adding corrupted client name to commitactionlog
	<u>PH22776</u>	TM1 Server crashing on scheduled chore completion

Component	APAR	Description
	<u>PH23179</u>	TM1 Server lock contention in 2.0.9 that does not occur in 2.0.3, degrades Cognos Analytics reports performance
	<u>PH23293</u>	Non-admin users encounter slower performance running Planning Analytics Workspace books
	<u>PH23505</u>	TM1 Server crash with MDX query during non-empty view construction with an unnecessary calculated member
	<u>PH23718</u>	TM1 Server crash: memory read error assigning dimension version string using Architect
	<u>PH24139</u>	Planning Analytics 2.0.8 IF 15 crash caused by race condition between session thread cleanups
	<u>PH24454</u>	TM1 Server crash in libc heap corruption
	<u>PH24495</u>	TM1 Server crash with default MaximumTILockObjects value
	<u>PH24939</u>	TM1 Server crash on Planning Analytics 2.0.8 IF 16 on Linux
	<u>PH25019</u>	TM1 Server crash upon logout when EnableSandboxDimension=T and sandbox is deleted
	<u>PH25068</u>	TM1 Server crash with optimizedclient=3 and private view
	<u>PH25417</u>	MDX functions RIGHT, LFET, LEN do not work anymore if used in an MDX select query
	<u>PI79271</u>	CreateHierarchyByAttribute fails due to cube rules
Web	<u>PH01079</u>	Pick list functionality is gone when hitting delete on a pick list cell
	<u>PH11185</u>	Unable to open worksheet with specific conditional formatting - failed to open the target workbook
	<u>PH12027</u>	TM1 Web subset editor copy/paste not working
	<u>PH12100</u>	Tm1RptRow ConsolidationDrilling parameter is now disabled by default
	<u>PH12890</u>	Larger drop-down in TM1 Web provides a spinning icon but does not appear when run in Planning Analytics Workspace
	<u>PH13978</u>	Planning Analytics Workspace actions occur twice for users on Windows 10
	<u>PH14102</u>	Buttons on worksheets don't work if the session is being reused

Component	APAR	Description
	<u>PH14637</u>	Action button option "go to another worksheet" doesn't work if worksheet was opened with URL API in Planning Analytics 2.0.6 IF 15
	<u>PH15299</u>	TM1 Web not reflecting conditional formatting
	<u>PH15411</u>	Pasting from clipboard is currently turned off by your browser.
	<u>PH16402</u>	Waterfall diagram looks different in Planning Analytics Workspace than in Excel
	<u>PH16410</u>	Unable to open specific report in TM1 Web with freeze panes enabled - failed to open target workbook
	<u>PH17536</u>	TM1 Web input "0" does not work in Planning Analytics 2.0.6
	<u>PH17596</u>	Opening websheet with chart in TM1 Web: failed to open the target workbook.
	<u>PH17643</u>	TM1 Web application report doesn't update data correctly
	<u>PH18229</u>	Action button to open a websheet is not working when used from tm1web/UrlApi.jsp
	<u>PH18322</u>	Missing "waiting" icon on websheets
	<u>PH18682</u>	Intermittent web browser freeze when working in TM1 Web
	<u>PH18860</u>	Excel with radio buttons grouped are not working as expected on TM1 Web after migrating from Planning Analytics 2.0.5 to 2.0.8
	<u>PH19043</u>	Hierarchy rows doubled when expanding by fast double-click in Planning Analytics Workspace
	<u>PH19273</u>	Quick report not refreshing on Planning Analytics Workspace/TM1 Web
	<u>PH19573</u>	Conditional formatting not applied in TM1 Web
	<u>PH19604</u>	Difficulty using cell reference in the Source object in the advanced properties of an Action button
	<u>PH20356</u>	Excel data validation appearing on the left panel in TM1 Web
	<u>PH20654</u>	Copy and paste of a multi-line Excel cell to Planning Analytics Workspace not working correctly
	<u>PH20823</u>	Excel data validation covers input cell in TM1 Web

Component	APAR	Description
	<u>PH20961</u>	TM1 Web showing Excel sheet tabs when Excel tabs are set as hidden
	<u>PH21127</u>	The order of the application of conditional formatting rules in TM1 Web should be the same as in Excel
	<u>PH21359</u>	REST API connection refused by content security policy (csp) - violation of "connect-src 'self' " directive
	<u>PH21441</u>	Snapshot to Excel from TM1 Web on specific published Excel file returns an error
	<u>PH21539</u>	Websheet dynamic report: Planning Analytics Workspace throws index error after rebuilding SUBNM update.
	<u>PH21574</u>	Unable to open websheet if it contains charts and merged cells
	<u>PH22286</u>	TM1 Web cube view doesn't adjust the column to a smaller width when collapsed
	<u>PH22512</u>	Subset editor from a cube view launched by URL API cannot delete elements
	<u>PH23280</u>	TM1 Web report does not show data in TM1 Web for a year selection, but data displays correctly in Planning Analytics for Excel and on PDF export from TM1 Web
	<u>PH23845</u>	TM1 Web does not open report when screen size is reduced due to formatting
Workspace	<u>PH06016</u>	Planning Analytics Workspace SC 37: a view with two hierarchies from the same dimension in some instances shows zero values when non-zero values are expected.
	<u>PH15003</u>	View rows with data are incorrectly suppressed when zero suppression is applied
	<u>PH16228</u>	Non-zero rows are suppressed when zero suppression is applied
	<u>PH16495</u>	Sort on a view with multiple alternate hierarchy consumes large amount of TM1 Server memory, sort takes an exceptionally long time to complete
	<u>PH18318</u>	Unable to enter characters in Planning Analytics Workspace, receive error "Unable to apply cell update. CubeCellWriteStatusElementsintersected"
