Welcome to the March 2020 update to IBM TRIRIGA CAD Integrator/Publisher. In this and future releases of IBM® TRIRIGA® CAD Integrator, installation for AutoDesk and Bentley products will be split. This fix pack provides the IBM TRIRIGA CAD Integrator/Publisher product for use with Bentley MicroStation CONNECT Edition.

If you use IBM TRIRIGA CAD Integrator / Publisher with Microstation V8i, you can install this fix pack. Note that this fix pack installs a new CI CONNECT. It does not upgrade your existing CI for V8i.

Note - If updates or corrections are required for this document, you can download the revised version from the 12.6.1.1 link on the Release Notes IBM Support page.

# IBM TRIRIGA CAD Integrator/Publisher 12.6.1.1 Important Information

The following item is important information concerning the IBM TRIRIGA CAD Integrator/Publisher 12.6.1.1 fix pack.

Area of Impact	Description
Installation	In this and future releases of IBM TRIRIGA CAD Integrator, installation for AutoDesk and Bentley products will be split. This release will specifically support Bentley MicroStation CONNECT Edition. Functionality will work the same, however you will find the navigation takes advantage of the CONNECT Edition ribbon format as opposed to the previous menu driven versions.
	<b>Note:</b> Although multiple different versions of the IBM TRIRIGA CAD Integrator may coexist on the same system, it is best practice to only run one instance at a time.
Installation	MicroStation CONNECT allows for one installation of CAD Integrator. This is because there can only be one "TririgaCIBridge.cfg" configuration file in the Bentley CONNECT directory. If a user decides to have multiple CAD Integrator for CONNECT installations, they must manually update the tririga.cfg to point to the desired installation directory.
Launch	You do not have to use a CAD Integrator shortcut to launch CAD Integrator for MicroStation CONNECT as you did in previous versions. Simply open MicroStation CONNECT to access to CAD Integrator.
