Installation Tasks

To install IBM OpenPages GRC Platform 8.0.0.3 IF7, perform the following tasks.

Task 1: Ensure Global Search has been set up and started

If your deployment has a Global Search server included and you have never started Global Search, you must ensure that you have performed the Search server post installation tasks and that Global Search has been started at least once before applying this interim fix. If your deployment does not have a Global Search server then skip this task.

Note: For details, see the "Search server post installation tasks" topic in the *IBM OpenPages GRC Version 8.0.0 Installation and Deployment Guide* and see the "Starting and stopping servers" chapter in the *IBM® OpenPages® GRC Administrator's Guide*.

Task 2: Ensure that all OpenPages servers and services are running except the Global Search server

Note: For details, see the "Starting and stopping servers" chapter in the *IBM® OpenPages® GRC Administrator's Guide*.

Task 3: Apply the OpenPages 8.0.0.3 IF7

Use the 8.0.0.3 OpenPages installer to apply the 8.0.0.3.7 Interim fix. Perform the following steps as the user that setup the Installation Server.

Using the installation app, do the following:

- 3.1 Ensure that the OpenPages 8.0.0.3 installation server is running and that the OpenPages 8.0.0.3 installer agents on the remote servers in the deployment (if applicable) are also running.
- 3.2 Copy the **openpages_interimFix_8-0-0-3-7.zip** file from the interim fix media into the `<InstallerMaintenance>` directory on the installation server.
- 3.3 Open the existing 8.0.0.3.x deployment and press the browser's **Refresh** button to refresh the installation app.
- 3.4 Click the *Deployment Task* drop-down and select *Interim Fix* and select *8.0.0.3.7* in the *Version* drop-down.

Perform the **Validate**, **Install**, and **Configure** actions to apply the interim fix updates to the OpenPages 8.0.0.3.x deployment.

Note: Each file in the OpenPages deployment that is replaced by the interim fix content is automatically backed up into the `<OPBackup8003>`, `<CCBackup8003>` or `<OPSearchBackup8003>` folder, as applicable.

Task 4: Ensure that all OpenPages servers and services are running including the Global Search server

Note: For details, see the "Starting and stopping servers" chapter in the *IBM® OpenPages® GRC Administrator's Guide*.
