

## IBM® Sterling Connect:Direct® Compatibility and Connectivity Chart

This chart shows the currently supported versions and platforms of Sterling Connect:Direct and the Connect:Direct Service Adapter on IBM® Sterling B2B Integrator and the compatible Sterling Connect:Direct versions. To determine if a Sterling Connect:Direct version is compatible with another Sterling Connect:Direct platform, find a platform and version number in the left column. Look across that row to the desired platform, and find the compatible Sterling Connect:Direct version and the connectivity type. Unless otherwise specified, the compatibility applies to all maintenance releases for a Sterling Connect:Direct supported version. Some features require a specific platform release level. See the documentation for each Sterling Connect:Direct platform for more information.
