Oracle announces availability of Oracle WebLogic Server 14c on IBM Power Systems running AIX!

On March 30, 2020 Oracle announced that Oracle WebLogic Server 14c is available on IBM Power Systems running AIX 7.1 and 7.2. The full Oracle WebLogic Server 14c support matrix is available for download at: https://www.oracle.com/technetwork/middleware/fmw-141100-certmatrix-6400512.xlsx

The announcement underscores Oracle's continuing commitment to deliver new versions of Oracle Fusion Middleware offerings on IBM Power Systems running AIX.

The product installation download can be found on Oracle's website, at: https://www.oracle.com/middleware/technologies/weblogic-server-installers-downloads.html

Oracle customers and/or Oracle Business Partners who have access to Oracle's My Oracle Support [1] website may log on and review this additional information.
