

# IBM Cognos Controller 10.4.2 - Fix List

| Component                      | APAR  | Description   |
|--------------------------------|---|---|
| General product                | <a href="#"><u>PH01895</u></a>  | xstagefact table growing all the time (never shrinking) despite "Number of Days Before Records in the Staging Tables are Deleted" being enabled             |
|                                | <a href="#"><u>PH02227</u></a>  | Refresh in Excel add-in does not bring correct values   |
|                                | <a href="#"><u>PH03951</u></a>  | Long waiting time when saving changes (not closing) in Define Account Structure dialogue  |
|                                | <a href="#"><u>PH11146</u></a>  | Long delay in numbers showing up in the Intercompany Reconciliation in Controller Web for the counterpart information                                       |
|                                | <a href="#"><u>PH11767</u></a>  | Generating company structure returns an error after a company moves in the company structure  |
|                                | <a href="#"><u>PH13509</u></a>  | t=controller in CCR 10.4 setup guide (Controller + CA)  |
|                                | <a href="#"><u>PH14417</u></a>  | When going to System Audit Log - Overview and Data and sorting the results by clicking on one of the column headers an error occurs                         |
|                                | <a href="#"><u>PH14482</u></a>  | In 10.4.0 &10.4.1 it appears essential that this checkbox is ticked to avoid an error message. However, the documentation does not specify this requirement |
|                                | <a href="#"><u>PH14539</u></a>  | Intermittently get wrong data (inside 'Reports - Company Journals Across') - values change all the time (Oracle DB)   |
|                                | <a href="#"><u>PH14649</u></a>  | Correct License Agreement report for showing Active Users when using SSO  |
|                                | <a href="#"><u>PH15367</u></a>  | SLMTag Logger runs slower than SLMTag Report (performance issue)  |
|                                | <a href="#"><u>PH16098</u></a>  | Journal across report showing wrong figures   |
|                                | <a href="#"><u>PH16104</u></a>  | Chrome and Firefox: unable to access Planning Analytics   |
|                                | <a href="#"><u>PH16110</u></a>  | Currency translation report not working   |
|                                | <a href="#"><u>PH16224</u></a>  | Issues with the Button Placement in the Historical Rates and Depreciation Details Windows   |
|                                | <a href="#"><u>PH17055</u></a>  | Power Point links to excel don't work after installing Cognos Controller 10.4   |
|                                | <a href="#"><u>PH17355</u></a>  | "Company Structure Reports" - "Tree Structure" looks wrong (boxes are to tall/large) when 'select format' is set to HTML                                    |
|                                | <a href="#"><u>PH17520</u></a>  | Generate Controller Link report: Excel crashes or hangs (performance improvement)   |
|                                | <a href="#"><u>PH17571</u></a>  | Error : file C:\WINDOWS\TEMP\00005USP2MGY.TMP is too large " when running "acquisition calculation"   |
|                                | <a href="#"><u>PH17626</u></a>  | Report Server settings in Controller Configuration, error : "The server did something wrong"  |
| <a href="#"><u>PH17774</u></a> | Web must allow input of own company as counter company, in standard forms, the same as classic, but only when counter dimension is used |   |

| Component | APAR                           | Description  |
|-----------|--------------------------------|--|
|           | <a href="#"><u>PH18264</u></a> | Consolidation with status fails with error "Violation of PRIMARY KEY constraint 'PKNC_XDB19'. Cannot insert duplicate key in object 'dbo.xdb19'. The duplicate key value is (1908AC, G35010,SGD,S511000G36 , 1016.2136." |
|           | <a href="#"><u>PH18265</u></a> | Issue in FAP possibly truncating data  |
|           | <a href="#"><u>PH18275</u></a> | Controller Cloud log in UI issue   |
|           | <a href="#"><u>PH18962</u></a> | Controller Web 10.4.0 -Warning message translation issue (Swedish)   |
|           | <a href="#"><u>PH19087</u></a> | Add Planning Analytics TM1 web link into controller web shows "Link to planning analytics not configured"  |
|           | <a href="#"><u>PH19200</u></a> | Oracle Errors when running the same copy process in short succession   |
|           | <a href="#"><u>PI44373</u></a> | General configuration settings doesn't delete staging tables   |
|           | <a href="#"><u>PI59936</u></a> | Microsoft Excel is waiting for another application to complete the OLE action  |
|           | <a href="#"><u>PI96945</u></a> | Controller Web reconciliation values not updated real time   |
