IBM Planning Analytics 2.0.9.6 LC - Fix List

Component	APAR	Description
Clients	PH14664	Sandbox still available for a Planning Analytics for Excel report in Planning Analytics Workspace despite it being disabled for admin users
	PH19941	Print report with Office 2016 finished after 4 hours
	PH31269	Perspectives session/disconnect issues when using multiple sessions in Excel
	PH32547	Password in Tm1 Web was allowed to be shorter than PasswordMinimumLength specified in Tm1s.cfg
	PH33591	Download as .csv file (via ODBC drillthrough) from TM1 via Planning Analytics Workspace or Planning Analytics for Excel results in incorrect data in downloaded file
	PH33810	Perspectives is showing a less precise value in cube viewer at a consolidation level than when viewed in a slice
Server	PH31189	Planning Analytics database crashes when deleting alternate "leaves" hierarchies
	PH31597	Dynamic subset inadvertently changed to a static subset when nested, MDX expression lost
	PH33446	A single-line feeder statement doesn't work. Only the first element gets fed, not any subsequent ones.
	PH33540	TM1 server isdisabled flag permits user logins into Planning Analytics server with CAM
	PH33904	Clearing a cell (ie: updating cell with null), results in the value 0 being written into the cell if UNDEFVALS is specified
	PH34011	TM1 server crashed with invalid pointer on TurboIntegrator process
	PH34237	Potential de-referenced null pointer in "dbstgBuildDimensionSelections" causing server crash

Component	APAR	Description
	PH34665	Drastic performance loss of DimensionDeleteAllElements( ) on large dimensions compared with earlier versions
	PH34670	Spread failed with ConsolidateAvg rule when spreading to zero cells
