

# IBM Planning Analytics 2.0.9 LC - Fix List

Component	APAR	Description
<b>General Product</b>	<a href="#">PH08976</a>	TM1 Perspectives crashes when rebuilding a specific active form
	<a href="#">PH13361</a>	Clientgroup.rux file gets removed when login to pmpsvc
	<a href="#">PH13907</a>	Internet Explorer compatibility view setting causing issue with Contributor
	<a href="#">PH14314</a>	Excel hangs after Print Report has succeeded
	<a href="#">PH15503</a>	Planning Analytics Administration (version 2.0.41.1049) can be accessed on port 9012 and shows the Websphere Liberty landing page
<b>Server</b>	<a href="#">PH03967</a>	Unable to paste cell(s): "System Parameter Type Invalid" when pasting to multiple hierarchies model
	<a href="#">PH04090</a>	TM1 Server crash due to stack overflow
	<a href="#">PH04775</a>	Calculated members that use numeric MDX expressions like AVG and STDDEV do not function as expected
	<a href="#">PH05859</a>	Tm1api.bas is missing in tm1_64\tm1api directory.
	<a href="#">PH07473</a>	TM1 Web time out in 1 min
	<a href="#">PH10107</a>	ODBCOpen does not work when using DatasourcePassword argument- 'unable to open data source' error thrown
	<a href="#">PH10271</a>	"Check feeder" in Architect is not showing trace and value in Planning Analytics 2.0.5 compared to Cognos TM1 10.2.2 FP7 and 10.1.1 FP2
	<a href="#">PH11002</a>	TM1 server lock contention on rule in }ElementAttributes control cube
	<a href="#">PH11490</a>	TM1 server crashes when a process running a collection of other processes that moves users from CAM security to native security is run
	<a href="#">PH11594</a>	Private report (published) is no longer available hours later

Component	APAR	Description
	<a href="#"><u>PH11677</u></a>	TM1 immediate crashes when modifying a view – tm1server.dll, exception code 0xc00000fd
	<a href="#"><u>PH11955</u></a>	TurboIntegrator processes with AttrPutS and DimIx are running significantly slower in Planning Analytics 2.0.6/2.0.7 compared to TM1 10.2.2 FP6
	<a href="#"><u>PH12018</u></a>	TM1 Server crash due to corrupt subset
	<a href="#"><u>PH12073</u></a>	TM1 Server crash when running TurboIntegrator process that creates security groups and assigns the groups to users
	<a href="#"><u>PH12306</u></a>	Planning Analytics Workspace error when refreshing book: unable to fetch data xxx can not be found in collection of type cellset
	<a href="#"><u>PH12386</u></a>	TM1 Server crash on shutdown terminating unregistered clean up thread
	<a href="#"><u>PH12422</u></a>	Planning Analytics Server takes considerably longer to load compared to TM1 10.2.2
	<a href="#"><u>PH13059</u></a>	Failed to write a buffer to the rawstore in tm1auditlog
	<a href="#"><u>PH13184</u></a>	Blocking situation - lock contention issue
	<a href="#"><u>PH13327</u></a>	TM1 Server instance crash during save data all
	<a href="#"><u>PH13360</u></a>	TM1 Server not validating certificate correctly when connecting to ssl secured CAM dispatcher
	<a href="#"><u>PH13403</u></a>	Consolidatedcountunique does not work anymore in 2.0.7
	<a href="#"><u>PH13871</u></a>	Cube view performance degradation, views that took seconds to open no longer open at all.
	<a href="#"><u>PH14377</u></a>	Linux threadIDs in tm1event.log and tm1server.log are different even though they are for the same process
	<a href="#"><u>PH14483</u></a>	TM1 Server crash updating elements when running currency update
	<a href="#"><u>PH14499</u></a>	Planning Analytics for Excel hubless mode: SUBSIZ displays incorrect number
	<a href="#"><u>PH14541</u></a>	ViewCreate, despite the optional AsTemporary argument set to 1, conflicts with permanent view
	<a href="#"><u>PH14550</u></a>	Planning Analytics TM1 server hang on Linux after running large number of ExecuteCommand through runprocess

Component	APAR	Description
	<a href="#"><u>PH14557</u></a>	TM1 Server crash in MTQ main thread due to lock synchronization from worker thread
	<a href="#"><u>PH14857</u></a>	TM1 Server crash due to an integer division by zero exception
	<a href="#"><u>PH15163</u></a>	Metadata tab skipped when executing a TurboIntegrator process in Planning Analytics 2.0.7
	<a href="#"><u>PH15489</u></a>	Alias processing very slow if there are cube rules in elementattributes cube
	<a href="#"><u>PH16195</u></a>	Users with read access to TurboIntegrator processes can edit process parameters in Planning Analytics for Excel
	<a href="#"><u>PH16199</u></a>	Invalid transaction log ID in archived logs error after more than 500 failed rep and sync
	<a href="#"><u>PH16388</u></a>	User-defined consolidation crash with PullInvalidationSubsets enabled in Tm1s.cfg
	<a href="#"><u>PH17220</u></a>	SaveDataAll process taking longer to complete, causing delays with other processes
	<a href="#"><u>PH17352</u></a>	Failed to write a buffer to the raw store in tm1auditlog with Planning Analytics 2.0.7 IF5
	<a href="#"><u>PH17358</u></a>	MTQQuery=F is not actually disabling MTQ for TurboIntegrator processes.
	<a href="#"><u>PH17465</u></a>	Data load TurboIntegrator process performing slower in Planning Analytics than TM1 10.2.2
	<a href="#"><u>PH17651</u></a>	TM1 Server crash (stack overflow) - tm1server!OBJECTLOCK::iscurr entcopylocked+0x18 -infinite loop due to race condition
	<a href="#"><u>PH18157</u></a>	Loading attributes within a TurboIntegrator process in Planning Analytics is much slower than older TM1 versions
	<a href="#"><u>PH19002</u></a>	TM1 Application (Contributor) sites are blank using Internet Explorer 11 with compatibility mode 7
	<a href="#"><u>PH19323</u></a>	Lock contention IXC on dimensions the first time two concurrent processes are creating views and subsets
	<a href="#"><u>PH19984</u></a>	SaveDataAll does not save all data to disk after specific lock contention occurrence
	<a href="#"><u>PH20241</u></a>	TM1 Server crash with circular reference
<b>Web</b>	<a href="#"><u>PH08253</u></a>	Planning Analytics 2.0.4 - TM1 Web snapshot to Excel from a drill through concatenates string from hyphen character onward

Component	APAR	Description
	<a href="#"><u>PH09093</u></a>	Since Planning Analytics 2.0.6 – images in websheets are not displayed in TM1 Web on Internet Explorer
	<a href="#"><u>PH09687</u></a>	Cubeview load error - unable to open the view
	<a href="#"><u>PH10628</u></a>	TM1 Web not respecting default cube view when language is not English
	<a href="#"><u>PH11411</u></a>	TM1 Web picklist doesn't function properly in a particular case
	<a href="#"><u>PH11619</u></a>	After resizing, TM1 Web becomes unresponsive in TM1 Applications when a cube view is docked to the bottom of the window
	<a href="#"><u>PH12067</u></a>	Currency Excel format is not the same in TM1 Web after an upgrade to Planning Analytics 2.0.7
	<a href="#"><u>PH12334</u></a>	Planning Analytics for Excel 2.0.41 / TM1 Web Planning Analytics 2.0.7 unable to open a websheet if it contains charts and merged cells
	<a href="#"><u>PH12896</u></a>	Export from TM1 Web fails when attempting to open the snapshot
	<a href="#"><u>PH13967</u></a>	TM1 Web removes leading blank or space characters from data validation cells
	<a href="#"><u>PH14463</u></a>	Incorrect websheet formatting in TM1 Web 2.0.7
	<a href="#"><u>PH14695</u></a>	IRR() Excel formula shows #num! when the result is negative on TM1 Web
	<a href="#"><u>PH14800</u></a>	Enabling csphheaderfilter in web.xml prohibits export from TM1 Web in Chrome and Firefox
	<a href="#"><u>PH14928</u></a>	String element with non-English character as value displays incorrectly in published Quick Report
	<a href="#"><u>PH14946</u></a>	Formatting issues in TM1 Web when custom formatting is applied over cells.
	<a href="#"><u>PH15041</u></a>	TM1 websheet graph/chart rendering issue
	<a href="#"><u>PI63773</u></a>	German user sees only English help file (when using CAM)
	<a href="#"><u>PI98421</u></a>	Since Planning Analytics, export from TM1 Web results in webpage error if debugging is enabled
<b>Workspace</b>	<a href="#"><u>PH15857</u></a>	Planning Analytics for Excel dynamic report published in Planning Analytics Workspace ignores Excel cell formatting when data source is Planning Analytics 2.0.8
