

IBM Resilient

Incident Response Platform

Release Notes v29.4

Release Date: April 2018

Based on a knowledge base of incident response best practices, industry standard frameworks, and regulatory requirements, the Resilient Incident Response Platform helps make incident response efficient and compliant.

FEATURES AND ENHANCEMENTS

The V29.4 release of the Resilient Incident Response Platform introduces the following new features and enhancements. All changes and bug fixes from the previous V29.3 release are included.

- **Security Updates.** For customers on the Red Hat Enterprise Linux version of the Resilient platform, this release includes all pertinent security updates to the underlying platform that have been released since the previous release of the Resilient platform. These security updates are provided in a .run file in the same folder as the 29.4 update. Instructions for installing them are included in the release announcement email. These updates are cumulative and include all relevant packages whether you upgrade from 29.0, 29.1, 29.2 or 29.3.
- **Privacy regulation updates.** Privacy regulations were updated to reflect changes to regulations in Delaware and Japan.
- **Sort order for incident notes.** It is now possible to choose whether incident notes are displayed chronologically with newest notes first or oldest.

CORRECTED ISSUES

The following table lists both the new and old codes, as appropriate, for issues.

Tracking Code	Issue
RES-7821	It is not possible to reorder the checkbox column in the List Incidents page. The checkbox column is always first.
RES-6086 DE3642	Install can fail if Tomcat fails to install properly.
RES-8246	Unable to delete or edit Source of Data field values if referenced by incident.
RES-8031	Unable to delete Resolution field value if referenced by incident.
RES-8289	Unable to import configs if incident has Source of Data values.
RES-8032	Unable to save Resolution field if value referenced by incident is disabled.
RES-7837	SAML user is not able to open an incident by navigating directly to a saved URL.
RES-7814	Unable to reassign incident if incident contains member that is no longer part of the organization.
RES-7894	Conditional tab visibility is not updated immediately after menu action changes.
RES-7829	Cannot update existing incident filters.
RES-8247	Conflict error when updating the Text Area field with rich text.
RES-8315	The postrm script does not specify full path to Python causing the wrong Python to be used under some circumstances.
